Weekly Coal Production

Production for Week Ended:
September 24, 1988

RECEIVED

OCT 25 1988

BOOK ORDER DIVISION

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, stocks, imports, and exports. This week's Supplement 2 contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended September 24, 1988, as estimated by the Energy Information Administration, totaled 19.9 million short tons, a 0.8 percent increase from production in the previous week. Coal production east of the Mississippi increased by 0.3 million short tons (2.8 percent), while production west of the Mississippi decreased by 0.2 million short tons (2.4 percent).

This week's coal output was 0.5 million short tons or 2.6 percent higher than in the corresponding week of 1987.

This report contains data on electric utility coal receipts and prices for June 1988 in addition to electric utility coal consumption and stocks for July 1988. Also included are data on U.S. coal and coke exports and imports for July 1988.

Some of the highlights of these data are:

- In the first half of 1988 (January through June) coal receipts at electric utilities were up 2.0 percent (6.7 million tons) over the 1987 level for the same period.
- Coal consumption at electric utility plants for January through July 1988 rose 5.2 percent (21.5 million tons) above the comparable 1987 level.
